ETD 2007

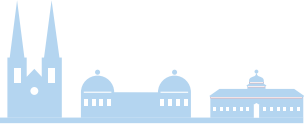

Added values to e-theses

Uppsala 13th–16th June 2007

Let's meet in Uppsala!

Uppsala University is honoured to invite you to Sweden to take part in the 10th International Electronic Theses and Dissertations Symposium.

This meeting offers scope for an exchange of experience and consolidation of cooperation at local, national and international levels. The themes of the conference – “Integrating ETDs with institutional processes and practices” and “Value added services” – call for reflection on opportunities for joint efforts among various players in the production and information chain, both inside and outside our universities.

Join us in Uppsala and help make the conference a success!
