Eberly College of Arts and Sciences

Strategic Plan Progress Report

December - 2007
Summary of Implementation Process:

When I was appointed Dean of the Eberly College of Arts and Sciences in the spring of 2005, I immediately embarked upon a strategic planning process because I knew the university had just completed a new strategic plan. The first phase was to complete a SWOT analysis with the departments and associate deans prior to my arrival on campus. Secondly, based upon the university plan and this SWOT analysis, I drafted a strategic plan for the college. The draft was reviewed by the College Advisory Board, the college chairs, the college faculty, and the Provost. All suggestions made by these individuals were incorporated into the plan. This process was completed by January of 2006, and then each unit within the college was asked to develop a strategic plan modeled after the university and college plan. These plans were submitted during the spring semester of 2006.

During the summer of 2006, the college completed its first annual report, and part of the annual report summarizes the current “state of the college”, and documents what has been achieved during the last year to implement the college strategic plan. A second annual report was completed during the summer of 2007, and prior to the completion of the second report each department chair was asked to submit what the department had completed the previous year to implement the unit strategic plan. This material also was used under the departmental section of the annual report. Therefore, it has been our goal to create a process in which each unit within the college and the college as a whole is continuously working to implement the university’s strategic plan.

The success of the process speaks for itself. At the present time, the Eberly College has record enrollments, record external funding, and record private giving. We have developed an enrollment management plan that has been very successfully implemented and have already achieved our 2010 enrollment targets. We have already exceeded the number of named professorships we had targeted in 2010 (our goal was five and we have eight), and we continue to increase the number of proposals submitted for external funding. The addition of a grants coordinator has especially assisted in the latter, and the hiring of that individual was made in order to implement the plan. We are currently searching for a full-time Director of Communications and Marketing and a webmaster as part of the implementation process for the Strategic Plan.

The attached report of the requested key indicators show the Eberly College is excelling in a number of categories. As previously mentioned, the enrollments, external funding, and private funding are at all-time highs so the challenge for us will be to surpass these records in the future. However, a major critical issue to address is our retention especially as we examine the indicators that show our first-year retention has declined. With the addition of new assistant dean to address this group of students, and in addition to an endowed professorship that will focus on these students, the college will be striving to increase our retention rates. A critical issue for us has been how we address the growing number of majors with not a proportional increase in faculty and graduate teaching assistants. Our number of majors have increased by two-thirds or 2,000 students in the last five years, but our number of faculty have grown very slowly, and of the new
faculty that have been added many have been focused on the university’s research mission. Therefore, the teaching loads of these individuals have deliberately been kept low in order that they have ample time to seek external funding. Since WVU has continually sent the message to the undergraduate student body that the university is “student centered”, we must increase the number of faculty to address the classroom and advising needs of the undergraduate student body. In addition, as the college has placed a major emphasis upon increasing our graduate enrollments, we need additional faculty lines to serve this growing number of students.

As one would expect, the number of students receiving degrees at the undergraduate and graduate levels continue to rise in the college, and we are proud of the placement rate of our students as indicated in the table. Most of our departments report that their graduate students either find employment or continue in graduate school once they receive their degrees from WVU and the Eberly College.

In terms of “high recognition national awards”, the attached tables show that three of our faculty have received Fulbright awards in the last two years, and a number have received research awards. For example, we have four faculty members who are fellows of the American Physical Society, two NSF career grants, three fellows of the American Association for the Advancement of Science, one as a fellow in the Japanese Physical Society and one Alfred P. Sloan Research fellowship and one chosen as a Beckman Young Investigator. In the humanities, we have a Huntington Library Fellow, a fellow of the American Philosophical Society, a Folger Library Postdoctoral Fellow, a Folger Library Fellow and an American Academy in Rome Fellow. All of these awards indicate that our faculty are recognized nationally and internationally which is the major focus of our college vision statement.

Since most programs in a College of Arts and Sciences do not have an accreditation process, there are fewer ways that they receive national recognition as compared to the professional schools. However, our Department of Physics has been recognized for its federal funding, our Department of Political Science and Department of Communication Studies have been recognized for their research productivity, and our Department of English and Division of Public Administration have been ranked in U.S. News and World Report for their academic programs. We will need to continue to work on our rankings in the future, but recruiting additional faculty and retaining our current outstanding faculty will be key to achieving this goal.

In summary, the Eberly College has continued to thrive in recent years and has set into place a strategic planning process that is ongoing and creates accountability at all levels of the college from the units to the individual faculty members. We are proud of our accomplishments and hope to build on them as we continue to implement the 2010 Strategic Plan and prepare for the 2015 Strategic Plan.
**Key Indicators:**

### Fall Headcount Enrollment

<table>

**2010 Research Target**

The goal of the Eberly College is to reach 14 million in funded research by 2010.
**Selected Objectives and Outcomes from ECAS Strategic Plan Adopted**

**Fall Semester 2005**

**Goal 1**

**Objective:** Expand marketing and recruitment efforts at both the undergraduate and graduate levels.

**Outcome for 2006-07:** Upgraded all ECAS web sites and developed a new graduate viewbook.

**Outcome for 2005-06:** Upgraded over half of the ECAS web sites and developed a new college viewbook.

**Objective:** Enrich opportunities for students through research, study-abroad, service learning, independent study, and internships.

**Outcome for 2006-07:** Received 15 new privately funded accounts for research/scholarship.

**Outcome for 2005-06:** Received five new privately funded accounts for research/scholarship.

**Outcome for 2006-07:** ECAS provided $60,175 to support study abroad in 35 different countries.

**Outcome for 2005-06:** ECAS increased its funding for support study abroad to $25,500, and students studied in 20 different countries.

**Goal 2**

**Objective:** Recruit and retain internationally and nationally recognized diverse, student-centered faculty and staff.

**Outcome for 2006-07:** Hired 10 new female faculty members, 2 Hispanic and one African-American. Hired over 22 replacement/new tenure line faculty.

**Outcome for 2005-06:** Hired eight new tenure track females and twelve males. Hired over 20 replacement/new tenure line faculty.

**Outcome for 2006-07:** Created the new F. Duke Perry, Endowed Professorship in Leadership Studies.

**Outcome for 2005-06:** The new endowment in Chinese Studies will create two new endowed professorships.

**Objective:** Increase innovative campus-wide programs that promote interdisciplinary academic exchange.

**Outcome for 2006-07:** Five new interdisciplinary projects were undertaken.

**Outcome for 2005-06:** Three new interdisciplinary projects were undertaken.

**Goal 3**

**Objective:** Enhance the academic success of students by creating a student-centered environment.

**Outcome for 2006-07:** Awarded 243 students Academic Enrichment Grants.

**Outcome for 2005-06:** Awarded 199 students Academic Enrichment Grants.
Goal 4
Objective: Encourage faculty/staff to collaborate within ECAS, with other colleges and units, and with colleagues at other universities to seek external support for teaching, research, and service projects.
Outcome for 2006-07: ECAS submitted 248 proposals to Research and Sponsored Programs which was 5 more than the previous year.
Outcome for 2005-06: ECAS submitted 243 proposals to Research and Sponsored Programs which is 19 more than the previous year.

Objective: Emphasize innovative and niche programs to increase graduate student enrollment.
Outcome for 2006-07: Graduate enrollment increased by 2.7%.
Outcome for 2005-06: Graduate enrollment increased by 7%.

Goal 5
Objective: Reward faculty innovation to recognize intellectual property and industrial relationships that benefit the state.
Outcome for 2006-07: ECAS had 9 new patent applications.
Outcome for 2005-06: ECAS had 8 new patent applications.
