

**Solid bottom board modified to be a screened bottom board.  
A 'handled' plywood sticky board slides out the rear.**

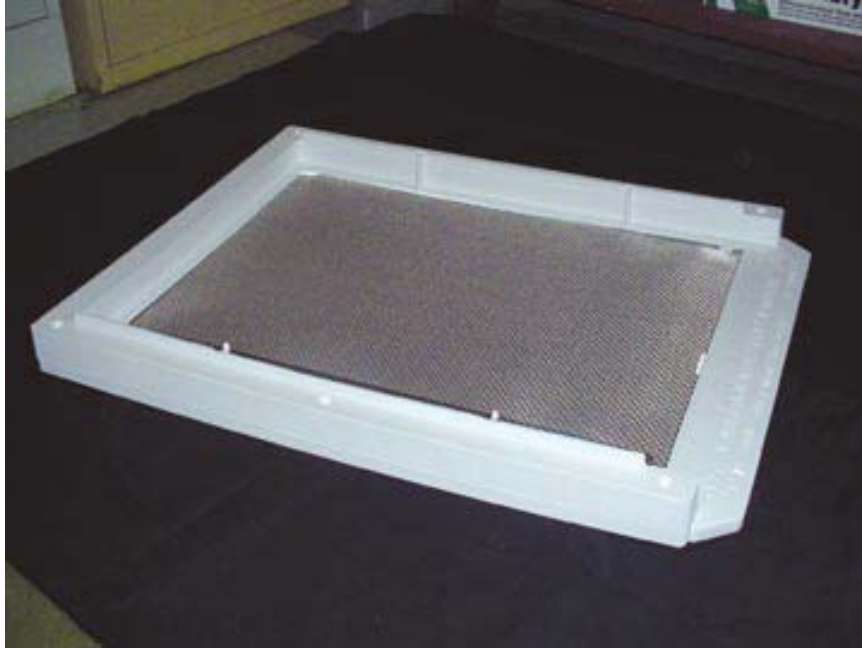

**These were used for our experiments. For economy, The plywood sticky board was replaced with illustration board, with a duct tape handle and the rear opening was covered by a strip of duct tape.**

**A Simple Screened Bottom Board for sale on the web.**

**The ultimate screened bottom board with two removable trays.**

**Dadant bottom boards: above, the stainless steel screen option;  
Below, the standard screened bottom board.**

Screened Pallet; Florida, 4 April 2006

A close-up photograph of a metal clip attached to a wooden pallet. The clip is a greenish-grey metal piece with two screws, positioned at the corner of the pallet's wooden slats. The pallet is made of dark, weathered wood and sits on a metal mesh screen. A light blue painted wall is visible in the upper left corner. The word "clip" is printed in black text on the metal piece. A semi-transparent grey banner with white text is overlaid on the bottom left of the image.
