ETD 2006

*Unlocking Scholarly Access:
ETDs, Institutional
Repositories and Creators*

Program registration, call for papers, hotel and other information is available on the conference website.

About the Conference

The Ninth International Symposium on Electronic Theses and Dissertations is organized by the Networked Digital Library of Theses and Dissertations (NDLTD).

The NDLTD initiative is an open federation of over 200 member universities and supporting organizations including research institutions and private companies.

What We Do

NDLTD activities focus on universities, libraries, faculties and graduate students in order to support authoring, indexing, archiving, retrieving and dissemination of electronic theses and dissertations world wide.

NDLTD's goal is to improve graduate education by encouraging students to produce electronic documents, use digital libraries, and understand publishing issues.

ETD 2006 will provide a forum to:

- Share the secrets of successful ETD programs.
- Learn about new developments related to ETD authoring, archiving and dissemination.
- Meet and discuss ETD challenges and issues with participants from around the world.
- Build skills that could facilitate ETD implementation at your university.
- Review issues that influence the success of your ETD program.
- Present experiences and research to the ETD community.

About Québec, Canada

Founded in 1608 by Samuel de Champlain, the city of Québec is Canada's oldest city and the capital of the Province of Québec. 95% of its inhabitants speak French and have English as a second language.

Carved into the bluffs overlooking the majestic St. Lawrence River, Québec City is the only walled city on the American continent north of Mexico. In the midst of a region known for its beauty, the city has been recognized by UNESCO as a World Heritage Site of special historical and cultural significance.

About Laval University

Laval University is the first French university in America. With its 36,000 students, 17 faculties and 350 programs at three cycles of study, Laval University is without question a large university. It is also a major research university, with more than 125 research teams and centers and an income of over 230 million dollars a year, of which a quarter is generated through partnership with private enterprise. Laval University is among the 10 most important research universities in Canada.
